Airframe Details:	The SR20 is a low?wing, four?seat composite monoplane with a very high build quality. Smooth, and long wingspan give it a sleek, modern look. Free?castering nosewheel allows tight turns, and forward visibility due to the low?profile panel. The side?stick “side yoke”, offering intuitive control mixture, boost, and flap controls are well?placed, and the ability to push forward and accelerate v control. A Cirrus Airframe Parachute System (CAPS). This, combined with its advanced avionics, desirable for both flight training and personal travel.
